Project Title:

Online Food Court

Short Description:

Online food court project will have two types of user's customers and vendors. If any customer who what to order some food trough this food court an account should require. Customer can create his own account by giving his email id and some more information. Using an email account customer can create only one account. By sing up customer will able to see restaurants and food items belonging with restaurants and order food items. For vendor accounts restaurant owner have to create a business account here by giving information. Login procedure is same as customer account. Vendor account holder can add food items, update them and delete them. There will also be a section for customer's order. They can view all customers order through this section.
